

Maple 14 Installation Instructions for Windows

Click on the **Start Menu** and then click on **Run**. Type `\\appsserv.goucher.edu\` in the field and then click **OK**. You may be asked for a username and password. Type in `gadmin\<username>` and then your network password.

(In Vista or Windows 7, type the server address in Start Search field)

Open the Maple 14 folder. Then double-click the **Maple14WindowsInstaller.exe** application and click **Run** to launch the installation wizard.

Note: Make sure that all other programs are closed before installing this program.

When the InstallAnywhere wizard appears click **Next**. Read and accept the license agreement then select **Next**.

Keep the default installation drive the same. Click **Next**.

Select **Full Installation** to install all files including the *Watcom C Compiler* and then click **Next**.

Select **Yes** to have shortcuts installed and then click **Next**.

Keep the default settings for the next couple of screens and click **Next**.

Enter the name or IP address of your Maple license server.

License server:

eagle.goucher.edu

Port number (optional):

27000

Make sure that **Network License** is selected and click **Next**.

Type `eagle.goucher.edu` in the **License server** field then click **Next**. Port **27000** is fine.

View the installation summary to make sure the settings are correct and then click **Install**.

When the installation has completed, select **Yes, restart my system** and then click **Done** so that the changes can take affect immediately.
