How to Install JMP 15 on Windows

Note: These screenshots were taken using Chrome. Downloading the software from another browser may differ slightly.

Before You Get Started:

- Make sure you are connected to GoucherWIFI if you are on campus. If you're off campus, connect using Cisco AnyConnect VPN.
- Make sure you have administrator rights on your computer. It will not allow you to install if you do not have rights.
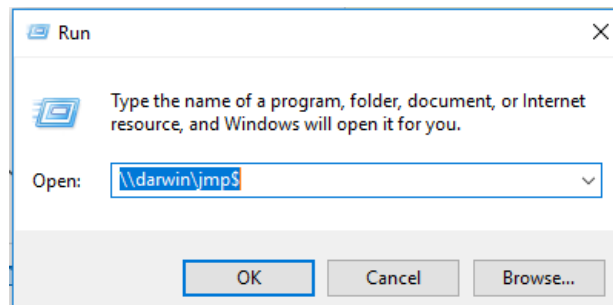

Instructions:

Part I: Download and Install the Software

1. On your computer, launch the Run command by pressing the **Windows** key and the letter "R" on your keyboard.

2. Type the following in the *Open* field: \\darwin\jmp$\ and hit **OK**.

3. Enter **[username]@goucher.edu** in the *Username* field and then type in your Goucher password in the *Password* field. **Note:** replace [username] with your actual Goucher username.
4. Open the "SAS Software Depot (Windows)" folder and drill down to the following folder: JMP →JMP_Pro → 15_2 → Windows.

5. Then double click the **Setup** application icon.
6. Select **Yes** to install the application.
7. Click **Next** and follow the prompts keeping the default options.

8. Click the **Install** button. This step may take a few minutes (longer if connecting from off campus using VPN).
9. Click **Finish** when done.
10. Launch **JMP 15 Pro** from the *Start* menu to make sure that the license file is installed. If not, move to Part II.
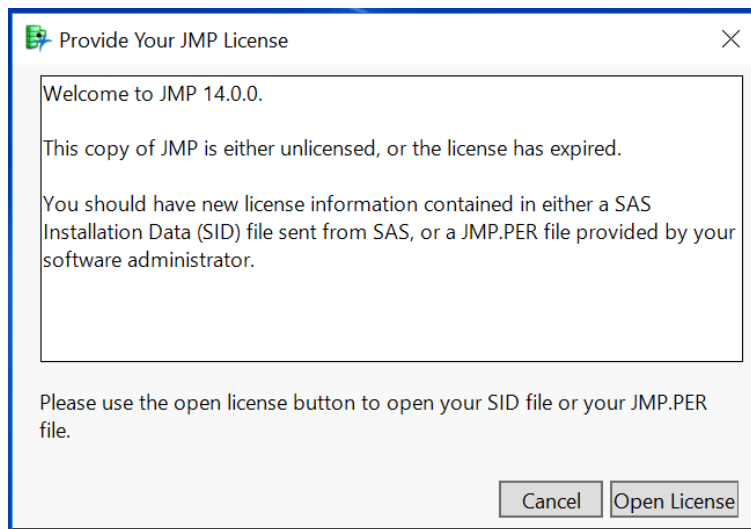

NOTE: If installed successfully, it should ask you to register your copy. Select **Wait to Register** to bypass.
Part II: Apply the License

1. Open the **SAS Software Depot (Windows)** folder and then then **sid_files** folder from the Darwin drive.

Name	Date modified	Type
📄 JMP140_9CD46Q_70222337_Win_X64	7/20/2020 5:05 PM	Text Document

    « SAS Software Depot (Windo... › sid_files   Search sid_files

2. Either drag or copy and paste a copy of the *JMP* text file to your desktop. **Note:** the name of the text file may differ from what is in the image.
3. Go to *Start* menu and launch the **JMP** application. You should be prompted with the following:

    Provide Your JMP License

    Welcome to JMP 14.0.0.

    This copy of JMP is either unlicensed, or the license has expired.

    You should have new license information contained in either a SAS Installation Data (SID) file sent from SAS, or a JMP.PER file provided by your software administrator.

    Please use the open license button to open your SID file or your JMP.PER file.

    Cancel   Open License

4. Click the **Open License** button and browse for the *JMP* text file that you saved to your desktop. You should then see the following message:
    JMP Alert

    ⓘ Your license has been accepted. Thank you.

    OK

5. Click **OK** and JMP should launch to the startup.

NOTE: If you launch JMP and you're not prompted to install the latest license, check to make sure that your current license hasn't expired by going to the Help menu and selecting **About JMP**.

```
User: ████
Administrator: IT
Organization: GOUCHER COLLEGE
Site ID: 70222339
Expires: 06/29/2020
Number of Users Allowed: 999
Microsoft Windows 10 Pro 64-bit (10.0.17134.0)
```

If the license has expired, then go to the Help menu and select Renew License. If the Renew License option isn't available, then you are most likely running the latest version.
