How to Install JMP 15 on a Mac

Note: These screenshots were taken using Firefox. Downloading the software from another browser will be different.
Before You Get Started:

- Make sure you're connected to *GoucherWIFI* if you're on campus or Cisco VPN Connect if you're off campus.
- Make sure you have administrator rights on your computer. You will not be able to install without it.
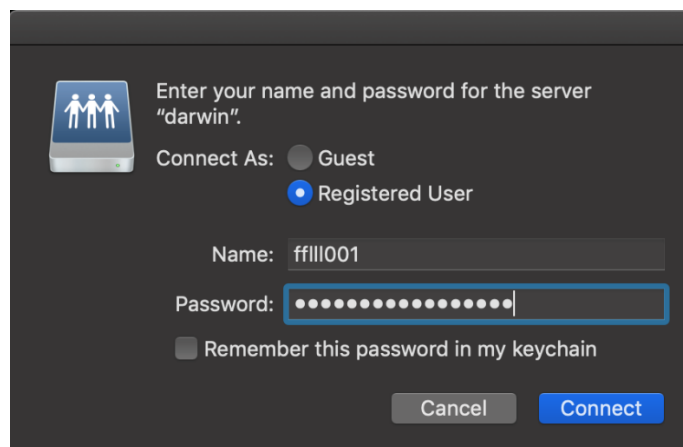

Instructions:

Part I: Download and Install the Software

1. Click the **Go** menu from the *Finder*.
2. Select **Connect to Server** from the drop-down list.
3. Type **smb://Darwin/jmp$/** in the window and click **Connect**.

4. In the *Connect As:* section, select **Registered User**. Then type in your Goucher username and password in the appropriate fields. Then click **Connect**.

5. Open the **SAS Software Depot (Mac)** and look for the JMP-Install.dmg file.

Name
📄 cd.id
🌐 depotsummary.html
▶ 📁 hot_fix
▶ 📁 install_doc
▼ 📁 **JMP**
▼ 📁 JMP_Pro
▼ 📁 15_2
▼ 📁 Macintosh
📄 JMP-Install.dmg

6. Go to JMP → JMP_Pro → 15_2 → Macintosh.
7. Double-click the **JMP-Install.dmg** file.
8. Double-click the **JMP Pro 15.pkg** file to launch the installation.

JMP Pro 15.pkg

9. Click **Continue** and follow the rest of the prompts. You maybe prompted to enter your local computer password during this process.
10. Click the **Close** button when install is complete.
11. Launch **JMP 15** from the *Applications* folder to make sure that the most recent license file is installed.
12. Select **Wait to Register** to continue.
13. You may be prompted to give JMP 15 accessibility features access. If so, follow the prompts to allow access from *System Preferences*. You will need to enter your local computer password.
14. If you are prompted for the license, follow Part II.

Part II: Apply the License

1. Open the **SAS Software Depot (Mac)** and then the **sid_files** folder.

2. Drag or copy and paste the *JMP txt* file to your desktop. **Note:** the license file name may look different since a new one is provided every year.
3. Launch **JMP 15** from the *Applications* folder and you should be prompted with a screen that states your copy of JMP is either unlicensed or has expired.
4. Click the **Open License** button and browse for the *jmp txt* file you saved to your desktop. You will then see the following message:

5. Click **OK** and then JMP should launch to the start up.

NOTE: If you launch JMP and you're not prompted to install the latest license, check to make sure that your current license hasn't expired by going to the *JMP* menu and selecting **About JMP**.

6. If it has expired, then go to the Help menu and select **Renew License**. If the option isn't available then you should be running the latest license.
